PROJECTS

Number Shifting | Game
- Simple game in which I use a two-dimensional array and put random numbers from 1 to 15.
- Users have to arrange the number in ascending order to win the in given no of moves

Create C Library On Analytic Geometry
- In this project, I have to make a simple library to perform all the necessary operations of geometry and use it

Create a Digital Phone Book
- In this project, I created a login system using database.
- After successfully user can perform all operations that is know as CRUD

Meme Making Website | Using Django Framework
- In this project, I create a login and registration page using the hash technique and store the data in database.
- After that if the user succuesfully logged in then they able to see the meme and one edit button after that edit page open and ask for two text input and edit their according their text
- In this whole project i am using API's to show memes and edit them

OTHER TECHNICAL SKILLS

- Video Editing | Using Sony Vegas Pro
- Adobe Photoshop
